

Activity Announcement

ASHP Conference for Leaders in Health-System Pharmacy

Planned in cooperation with the ASHP Section of Pharmacy Practice Managers

Activity Type: Application-and Knowledge-Based

CE Credits: 11.5 hours (1.15 CEUs)

Activity Fee: Registration fee required. See [registration form](#) for details.

Accreditation for Pharmacists

The American Society of Health-System Pharmacists is accredited by the Accreditation Council for Pharmacy Education as a provider of continuing pharmacy education.

Target Audience

This conference is beneficial for new and seasoned pharmacy managers who are interested in learning about contemporary leadership and management topics that will improve patient outcomes, medication use safety, and the quality of pharmacy services.

Activity Overview

This year's conference, Advancing Quality Outcomes and Innovations: Preparing pharmacy for the future will prepare you to acquire the tools necessary to achieve success individually and for your health system. This conference has become the “must attend” event for pharmacy leaders!

Select from five different breakouts that encourage problem solving and networking with colleagues in small groups. Participants will develop new skills and formulate take-home action plans in these 3.25-hour, intensive skill-building breakout sessions – including

- Outcomes Management: Are you identifying and measuring the right results
- Transitions of Care: Best practices and business models
- Financial Management Essentials: Strategies for compliance and revenue management
- Maximizing the Capacity for Pharmacy Services
- Leading the Pharmacy Workforce for the Future

Learning Objectives

After participating in this application-based CPE activity, participants should be able to:

1. Define the medication-use value equation, with an eye on putting the pharmacist in an optimal position.
2. Identify gaps in the transition of care, specifically areas in which pharmacists can have a positive impact on patient care.
3. Explore innovations that can result in reductions in pharmacy costs and lead to improvements in value.
4. Explain the implications of integrating electronic health records (EHRs) into the health system.
5. Review current market forces that are driving the movement to ambulatory care.
